DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species 1 in Paper No. 9 is acknowledged.
2. Applicant indicated that claims 1-6 and 24 read on Species 1, and further, that claims 1-6 and 24 are generic to Species 1-8. Accordingly, in addition to Species 1, Species 2-8 have been examined on the merits.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 3683

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1, 5, 6, and 24 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 6-9 of U.S. Patent No. 5,964,195.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the collar and housing correspond to the retaining member and occluding member respectively, further, the claims teach clamping the housing to the collar, thus, it would have been obvious to one of ordinary skill in the art to which the invention pertains at the time the invention was made to have mounted the retainer member to the occluding member in order to avoid having to connect the retainer member to the passage defining structure.

Re claim 5, in order for a membrane to have a surface facing the cooling water passageway, see claim 6 of '195, with no leaks, it is necessary for there to be an annular engage portion on the entire periphery of the membrane, accordingly, the limitations of claim 5 are inherent to the structure disclosed by claim 6 of '195.

Re claim 6, see claim 6 of '195.

Re claim 24, see claim 5 of '195, the open end of the housing, which corresponds with the occluding member, provides support for the recess defining the space of claim 24.

Art Unit: 3683

Allowable Subject Matter

5. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nguyen, LaBeau et al., and Coffenberry disclose related devices.
